

To PAWS ATLAS Users
From EADS NA T&S
Subject ATLAS Release 20120123 (1.39.7)
Date 23, January 2012

1.0 Overview

The following list describes an overview of changes included within version 2012-01-23(1.39.7) of all ATLAS based compilers and Lex files. All dialects and all PAWS software are built with the same version nomenclature (e.g. 1.39.7) for this release.

1.1 Enhancements / Changes affecting all dialects.

- 1.1.1 Changed the internal (AIL) Fortran 77 formatting code for the binary format of an integer. The AIL code changed for all compiler dialects **prior to IEEE 1989**, except IFTE and ESTS which already produced the correct code. This may affect customers who have developed their own IO Subsystem resources. Those customers should contact the EADS PAWS Support Team.

1.2 Enhancements / Changes affecting CASS/PC.

- 1.2.1 Allow the BUSS IPL sequence and pass to the IOam.
