

Racal Instruments™ VX405C

M/MA-Module Carrier

The Racal Instruments™ VX405C carrier provides the mechanical and electrical interfaces between the VXIbus and up to six (6) VITA 12-1996 standard M/MA-Modules.

Key Features

- **Multiple interface types in a single VXI slot**
- **Multiple instruments (DMM, counter, pulse generator, etc) in a single VXI slot**
- **Multiple serial protocol test (RS232, 422, 485, 1553, 429)**
- **VXI ATE “glue logic”**

Product Information

The VX 405C carrier provides VXI register configuration and access to the M/MA-Module I/O space and memory (if present). Each M/MA-Module is controlled separately and appears as a different logical address in the VXI environment.

Over 100 M/MA-Modules are available that can provide custom interfacing to the Unit Under Test (UUT). Up to six (6) unique interfaces may be provided in a single VXI slot.

Specifications

Note: The Astronics Test Systems policy is one of continuous development and improvement. Consequently, the equipment may vary in detail from the description and specifications in this publication.

Number of M/MA-Modules Carried

- Up to six (6); each appears as an independent VXI instrument

Unique Logical Address for each M/MA-Module

- Can be configured for sequential numbering or Modulo-8 numbering for HP/Agilent Command Module compatibility

M/MA-Module Triggers

- TRIGA or TRIGB of M/MA-Module may be connected to any VXI TTL Trigger under software control

M/MA-Module Interrupts

- Each module interrupt can have a software programmable VXI IRQ level

M/MA-Module Identification

- M/MA IDENT function supported

Connectors

- Each M/MA-Module has its own front panel and connectors

Indicators

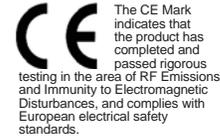

- MODID
- SYSFAIL
- M/MA-Module Access (6)

Power

- +5 V @ 1.3 A typical plus M/MA Power
- +12 V and -12 V provided to the M/MA-Module but not used by the carrier

VXIbus Compliance

- Complies with ANSI/IEEE Std. 1014-1987, IEC821, and VXIbus Rev 1.4
- A16/24/32:D8/16/32 Slave
- SYSFAIL: Supported
- Interrupts: ROAK, programmable levels
- BRX tied to BGX
- TTL Triggers: Supports I/O synchronous (SYNC) trigger protocol
- Form Factor: C-size
