The CTS-2700 is a powerful benchtop Communications Test System that can replace numerous shop instruments. The CTS-2700 significantly reduces:

- **Unit Under Test diagnostic time**
- **Maintenance and calibration costs**
- **No Fault Found conditions**
- **Life cycle cost-of-ownership**

The CTS-2700 is designed using Astronics Test Systems’ proven Synthetic Instrumentation architecture. Featuring 23 instruments, and both Automated and Standalone modes to test, record, and diagnose faults, the unit provides complete RF, Analog and Digital capabilities. The field-upgradeable, software-defined architecture features easy-to-use graphical user interfaces and enables testing with minimal operator intervention. Test Program Sets can be created easily using the included TestEZ® software suite.
