PAWS Studio
Release Notes

Version 1.37.11
August 12, 2009

Table of contents

1   Paws Developer's Studio

Version 1.37.11
**Release date: August 12, 2009**

1.1   Critical Items

1.2   Known Limitations

1.3   Enhancements

1.3.1   CASS/PC Preprocessor

PAWS Developer Studio has been enhanced to allow use of a CASS/PC Preprocessor component. This preprocessor component does **not** require an additional "Configuration.xml" file but, can be activated using a configuration setting for the ATLAS module.

For projects where the Preprocessor component is available the check box "**Preprocess ATLAS Files**" will be active. User may then choose to select/unselect a preprocessing step of ATLAS files – which is performed prior to compilation of ATLAS files.

1.4   Problem Reports

2   Run Time System

Version 1.37.11
Release date: August 12, 2009

2.1   Critical Items

2.2   Known Limitations

2.3   Enhancements

2.4   Problem Reports
