

**Release Notes**  
**TYX TRD**  
**Version 2.1.1**  
**January 16, 2003**

## **1. Overview**

This is a maintenance release, including minor fixes and enhancements.

## **2. Detailed Description**

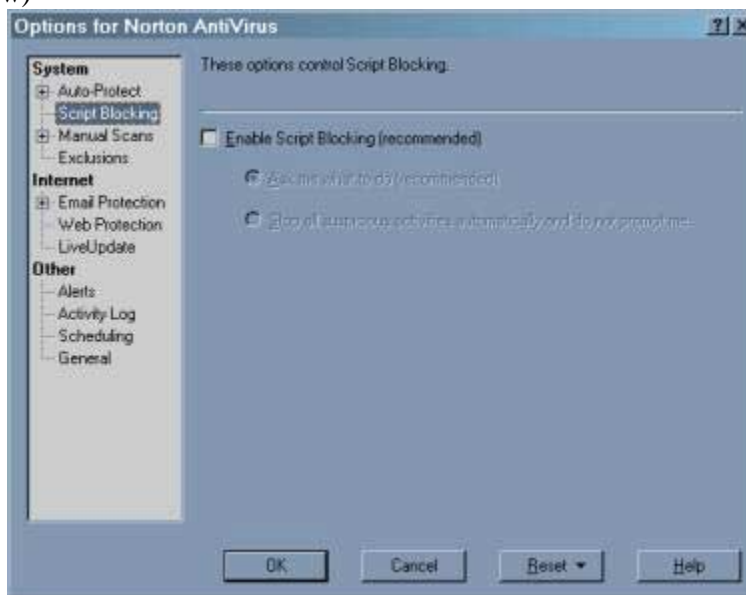

### **2.1. Critical items**

#### **2.1.1. Interaction with anti-virus software**

Some anti-virus programs automatically scan downloaded HTML pages, blocking the executions of scripts that are considered potentially dangerous. Because the TRD Editor is an HTML application and some of its pages interact with files in the local file system, these anti-virus programs may block the execution of scripts, thus compromising the operation of the TRD Editor. To avoid this behavior, you should configure your anti-virus software, disabling script blocking.

In Norton SystemWorks the above configuration may be performed as follows:

- open Norton SystemWorks
- go to **Options | Norton AntiVirus**
- select “Script blocking” in the tree area and uncheck “Enable Script Blocking” (see screen capture below)

Note: In some cases Norton AntiVirus keeps interfering with the TRD Editor, even if “Script blocking” was disabled. It appears that a configuration or a LiveUpdate operation re-enables the “Script blocking” option. If during the operation of the TRD Editor you receive a warning regarding a script, select the option “allow this activity once”. Afterwards, check the “Script blocking” option, as indicated before.

#### 2.1.2. Operating system compatibility

The product works properly with Windows NT 4.0 SP 6, Windows 2000 SP 2 and Windows XP.

#### 2.1.3. Internet Explorer compatibility

The product works properly with Microsoft Internet Explorer 5.5 and 6.0. It does not work with Internet Explorer 5.0.

#### 2.1.4. Microsoft Office compatibility

The generation of Word documents and the display of Excel reports works properly with Microsoft Office 2000 Service Release 1 and Microsoft Office XP.

#### 2.1.5. Microsoft Visio compatibility

The generation of flowcharts works properly with Microsoft Visio 2000. The current version of the product is not compatible with Visio 2002.

## **2.2. Known Limitations**

### 2.2.1. Functionality

The following categories of functionality, available in TRD 1.x versions, are not implemented in this release:

- ATLAS-to-TRD conversion

The following categories of functionality are partially implemented in the release:

- TRD formats
  - MIL-STD-1519 is the only format supported directly in the distribution; however, support for additional standardized or custom formats may be added by users

DiagML Import not supported in this release, due to changes in DiagML specification.

## **2.3 Enhancements**

The enhancements indicated below were implemented since the 2.1.0 Release.

### 2.3.1. Documentation update

The Help System and the Developers Manual are consistent with the implementation. Several corrections were made in the Installation Manual.

### 2.3.2. Test Renumbering

The function “Renumber Test Range“ allows now the same test number to be specified in edit fields From and Start.

## **2.4 Problem Reports**

None.
