

Flight Attendant Bags

Astronics DME's Flight Attendant Bags provide a convenient solution for storing items frequently used on the aircraft. All bags comply with FAR 25.853 and consist of one or two closing flaps with Velcro. Many sizes are available or they can be customized. The bags are easily accessible from their stowage compartments with large print name identification as well as grabbing/carrying handles.

Demo Kit

The demo kits contain the items flight attendants use to give a safety demonstration to passengers, including a life vest (optional), seat belt extension, and oxygen mask. P/N S6-02-0001-xxx
