

SmartTray by Astronics

SmartTray X1

SmartTrayX1 is a multi-purpose aircraft tray table for seatback mounted economy or premium economy class applications.

DESCRIPTION

Simple and robust design that is easy to install to accept passenger or airline owned portable electronic devices (PEDs).

The PED is held securely in place by a unique mechanism that expands and retracts automatically to the particular thickness of the portable electronic device.

CERTIFICATION

- Manufactured by certified Part 145 FAA & EASA licensees

FEATURES

- Holds passenger or carrier owned PED's for hands-free convenience when tray tables are in a deployed service position
- Relieves passenger fatigue from holding tablet devices for hours in flight
- Makes flying time more productive for business travelers by optimizing the available workspace
- Plenty of space to play, work, eat, or enjoy a beverage
- Maintenance free rotating mechanism designed for 40,000 life cycles
- Installs in minutes per passenger seat
- Patented
