

SmartTray by Astronics

SmartTray X2

SmartTray X2 is a multi-purpose aircraft tray table for seatback mounted economy and/or premium economy class applications.

When tray table is in stowed and locked position, personal electronic device (PED) can be stowed in a special back mounted frame with built-in tilt mechanism for enhanced viewing gate-to-gate.

DESCRIPTION

An economy class solution that helps airlines comply with recent FAA guidelines and safety regulations pertaining to use of portable electronic devices (PEDs) during critical stages of flight while allowing passengers uninterrupted use of their device.

The PED is held in a fixed or expandable position by a unique mechanism that expands and retracts to the thickness of the device when tray tables are in deployed service position (open).

CERTIFICATION

- Manufactured by certified Part 145 FAA & EASA licensees

FEATURES

- Allows for continued, hands-free use of a PED when tray tables are in service position or with the tray table in an upright and locked position
- Stowage and usage of PED device is within each passenger's arm's reach; safe, convenient, and easy
- Adjustable viewing angle
- Elevated design prevents damage to device by accidental spills
- Maintenance free rotating mechanism designed for 40,000 life cycle
- Installs in minutes per passenger seat
- Patented
